

Standish house

Emily F. Brewster

Given me by Miss Flora L
Brewster of Kensington in 1932.

Given by Laura Cakes Cushman

The Anchorage
Dunbury, Massachusetts
to the Dunbury Rural and Historical
Society August 30th 1975.

Note: The two men who excavated the site
were well intentioned but unskilled -
They doubtless found the bldg outlines
as they record - but only one was
Myles Standish's house. He died 1656 -
all houses in first fifty years or so in
New - were about same size and
structure as orig Alden house, well
documented. Additions were a
second story, a lean to, a salt box
roof addition - never a record or a
hint of an ell or any extension -
Standish's house would have been
rectangular - The adj. bldg - I
believe one built after his burned -
or can be accounted for (or discarded)
by a professional dig - This is my
opinion with my own observations.

STANDISH HOUSE

Emily Drew

Given me by Miss Flora L. Brewster of Kingston in 1932.

Given by Lura Oakes Cushman

The Anchorage

Duxbury, Massachusetts

to the Duxbury Rural and Historical Society

August 30th, 1975

Note: The two men who excavated the site were well intentioned but unskilled... They doubtless found the bldg (building) outlines as they record....but only one was Myles Standish's house. He died 1656. All houses in first fifty years or so in Dux(bury) were about same size and structure as orig(inal) Alden hse(house), well documented. Additions were a second story, a lean to, a salt box roof addition...near a record or a hint of an ell or adj(acent) extension. Standish's hse (house) would have been rectangular. The adj. bldg., I believe one built after his burned...or can be accounted for (or discarded) by a professional dig. This is my opinion with my own observations.

DW (Dorothy Wentworth)
